

## Data Centre

### Leverage our expertise

Our industry leading infrastructure means we can offer an expertly managed, scalable and highly secure service to ensure your Trimagic solution meets your business demands around the clock.

The Trimagic Data Centre (TDC) is an expedient option for clients wanting to outsource the IT infrastructure required to support their Trimagic solution.

#### Highest level of security in the southern hemisphere

The TDC is operated out of two Class 1 sites in Sydney. These sites have been accredited with the highest level of security. The TDC represents an efficient, cost effective and hassle free option for running your Trimagic solution.

#### We deliver your solution and the IT infrastructure and support

Instead of being managed in-house, your Trimagic application sits at the other end of a secure connection in the TDC which can be accessed via a browser from any location in the world.

You can be assured that your Trimagic solution will function and perform to its full potential because it is supported by leading edge IT infrastructure and expertise.

#### Features and benefits

**Unparalleled security and reliability.** Located at two of the most secure computing centres in the southern hemisphere.

**Complete access.** Available 24 x 7 x 365 worldwide.

**Ease of integration.** Ability to link internal and external content to manage content from a variety of sources.

**Cost effective.** No need for you to invest in, manage or update technical infrastructure.

**Hassle free.** System backup and IT management minimises your own IT expenses and dependencies.

#### About Trimagic Software

Trimagic software has provided world-class information management solutions for over 20 years because our solutions are innovative and they work. Our powerful and effective applications are built on the Inmagic product platform to help you manage all your information requirements.
